

# Woven badge

## Technical data sheet

### Submit your design

You can submit your design in .png, .jpeg, .pdf, .psd or .ai.

We recommend you create your digital design at full size right away, that way you can take into account the specifications below right from the first design steps

### Colours

A woven badge can contain up to 8 different colours. Your design has defined colour areas and may be quite detailed.

If you wish, you can specify pantone colours, we will make the match with our weaving yarns as close as possible.

Special colours:

Shiny metal wire in gold and silver

### The shape

Your badge can have any shape, at no extra cost. The most commonly chosen shapes are a circle, rectangle or shield; but all shapes are possible.

Even very fine shapes can be cut out with a laser cutter.

### Words or a text on your badge

Of course you would like a text, a name or a year on your badge.

The great advantage of these woven badges is that the weaving yarn is very fine, allowing us to display small details or small text neatly and, above all, legibly.

Just make sure your text is at least 2 mm high.

## The edge

The edge of a woven badge is fully laser-cut.  
Only for very fine shapes do we sometimes add an extra edge.  
(after consultation with the customer)

It is possible to add an additional one-colour embroidered or overlock  
(also called American or merrowed) border to the woven badges.  
This sometimes gives that extra touch and a more luxurious look.

An embroidered border is 2 mm thick. An overlock border is 4 mm thick.

## Graphic adaptations

Don't think you can do it? Don't panic, we're here for you!

Contact our graphics team at [info@ibadge.com](mailto:info@ibadge.com) to have your design reviewed,  
or ask about options to get you started.

### Example

- Width 10 cm
- Up to 8 colours
- Minimum line thickness: 0.5 mm
- Minimum font height: 2 mm
- Overlock or American cuff
